
Feasible histories, selected using current observations only | accepted 28/28
History A: test_300
History B: test_301
Current-observation match: PASS
Command
Actual tool
Indentation (mm)
Time (s)
Actual position
Actual velocity
Total force
Left lateral
Right lateral
Acceptance threshold
Absolute residual / sensor resolution
A: hidden slow field at prediction cut
B: hidden slow field at prediction cut
y (mm)
x (mm)
Identical future command: slow press
History A
History B
Force (N)
A - B (mN)
Time after prediction cut (s)
Slow internal strain norm (truth)
